

---

## Performance Concrete Sulfate Environments Research

**the performance and service life prediction of high ...** - the performance and service life prediction of high performance concrete in sulfate and acidic environments by shuo zhang florida international university, 2015 miami, florida professor atorod azizinamini, major professor concrete substructures are often subjected to environmental deterioration, such as **performance of mortars exposed to different sulfate ...** - performance of mortars exposed to different sulfate concentrations ... of concrete subjected to sulfate environments ... that the performance of the blended cement concrete is significantly ... **evaluation of class c fly ash in sulfate environments ...** - concrete in sulfate-rich environments. 17. key words sulfate, resistance, class c fly ash 18. distribution statement no restrictions. this document is available to the ... best test or the test most linked to field performance, but rather because it is the test most commonly used, specified, and included in national and international guidelines **performance of fly ash and stone dust blended concrete in ...** - verma et al. concrete research letters vol. 4(1) - march 2013 570 mineral additives, which are pozzolanic in nature, densify the matrix and improve the interface of cement paste & aggregates and improve the performance of concrete in sulfate acidic environments. **performance of different types of pakistani cements ...** - this paper reports the results of a study conducted to evaluate the performance of different types of pakistani cements exposed to various aggressive sulfate and chloride environments. mortar **performance specifications for durable concrete** - verify the concrete meets the performance criteria as ... and aggressive environments, chapter 4 of aci 318-053 is prescriptive in nature. as such, the requirements included in aci 318-05 imply that, if the specified limits and good ... exposed to sulfate attack\* s-1 concrete subjected to very severe sulfate exposures. **performance of anthill soil replaced concrete in sulfate ...** - resisting the sodium sulfate (na<sub>2</sub>so<sub>4</sub>) attack. this work investigated the potential use of anthill soil (ahs) to improve the performance of concrete in sulfate aggressive environments. an ahs replacement of 30% (per cent) by the weight of cement was used to make concrete test bars and cubes. **leaching of calcium from concrete in acidic and sulfate ...** - leaching of calcium from concrete in acidic and sulfate environments ... effects of acid and sulfate attacks and leaching of calcium from concrete has not been fully ... of the cementitious materials and its performance; hence, if calcium is leached during chemical attack it must be **high-performance concrete, chapter 17 - civil engineering** - high-performance concrete • high modulus of elasticity • high abrasion resistance • high durability and long life in severe environments • low permeability and diffusion • resistance to chemical attack ... sulfate attack astm c 1012 0.10% max. expansion at 6 months for moderate sulfate **ettringite formation and the performance of concrete** - concrete from moist environments. secondary ettringite is not detrimental to concrete performance. [concrete in photo exposed to phenolphthalein stain to highlight features.] ... =3.14%) to increase the amount of available sulfate in the concrete. concrete prisms made from these cements were **sulfate resisting cement - cementaustralia** - sulfate resisting cement sulfate resisting cement is a blended cement designed to improve the performance of concrete where the risk of sulfate attack may be present. it also provides improved durability for concrete in most aggressive environments, reducing the risk of deterioration of the structure and structural failure. **effects of substances on concrete and guide to protective ...** - deicer, and sulfate environments. ... field performance (history) or by testing to be susceptible to alkali-aggregate reaction (aar), appropriate measures should be taken to ... table 1. requirements for concrete exposed to sulfate-containing soils and solutions **a critical review on test methods for evaluating the ...** - concrete in aggressive aqueous environments, performance, testing and modeling 3-5 june 2009, toulouse, france 298 a critical review on test methods for evaluating the resistance of concrete against sulfate attack k. van tittelboom and n. de belie magnel laboratory for concrete research, ghent university, belgium abstract **accelerated test for measuring sulfate resistance of ...** - accelerated test for measuring sulfate resistance of hydraulic cements for ... description of an accelerated test for measuring sulfate resistance of cement paste. for more ... performance, concrete pavements in contact with sulfate-containing soil or water must be
